

# Keepem Buzies™

Science Games for 5 and under

## Playing With Shadows

Shadows are a great concept to start with kids! Make different shapes and talk about what you need to make a shadow; a light source, an object, and a surface to see the shadow!

## Talking about the weather

The change in seasons is always a fun topic. Talk about what feels different when it changes from winter to spring, what different clothes people wear, what types of activities they do. Take a trip in your mind to a different climate, what would you pack?

## Make your own rainbow!

Design your own rainbow all about you!  
First row - Color of your eyes  
Second row - Color of your hair  
Third row - Color of your shirt  
Fourth row - Your favorite color  
Make them all about one trait for the entire family or mix them all up!
